

# MEGA LUBE

## MEGA DUTY EP2 HEAVY DUTY PINS AND BUSH GREASE

**Characteristics:** **MEGA DUTY EP2 GREASE** is a multi-purpose lithium complex grease, with excellent high temperature performance and long life capability. High performance, low water washout and good protection against bearing corrosion, combined with excellent mechanical stability and load-carrying capability makes it an ideal heavy duty grease.

**MEGA DUTY EP2 GREASE** consistently gives excellent high temperature performance and a wide operating temperature field from  $-20^{\circ}\text{C}$  to  $+150^{\circ}\text{C}$ . EP additives combined with the high base oil viscosity increase the load carrying capacity and reduces wear.

This product is suitable for all grease application. It is especially suitable for lubricating pins and bushes and grease-lubricated roller bearings running at low speed, because of the special EP additives it is particularly recommended in off highway heavy load wheel bearing conditions at normal and high temperatures.

**Data:**

NLGI consistency	2
Colour	Red
Thicken Type	Lithium Complex Tacky
Drop point $^{\circ}\text{C}$	$>260$
Timken OK load kg.	$> 27$
Worked penetration	280
Base oil viscosity @ $40^{\circ}\text{C}$	470
Viscosity Index	98

**Special features:**

- ❖ **Resistant to water wash out**
- ❖ **Protects bearings against corrosion**
- ❖ **Excellent lubrication properties**
- ❖ **Long life**
- ❖ **Economical**
- ❖ **Good anti-wear properties**
- ❖ **Excellent load carrying characteristics**
