

MEGA LUBE

LITHIUM CALCIUM EP 2 GREASE

Characteristics: **LITHIUM CALCIUM EP 2 GREASE** is a tenacious extreme pressure, lithium calcium grease giving excellent water repelling properties and in combination with a high viscosity base oil, enhances lubricity and load carrying capacity.

Application: **LITHIUM CALCIUM EP 2 GREASE** has been specially developed for applications where the combination of heavy loads, slow speeds and water washout exclude the use of conventional products. These conditions exist in heavy industries such as steel and paper mills, cement works and quarries.

LITHIUM CALCIUM EP 2 GREASE is recommended for the lubrication of heavily loaded slow running plain ball and roller bearings in rolling mills, conveyors and crushers.

Data:

Thickening agent	Lithium / Calcium
NLGI Classification	2
Worked penetration @ 25°C	280
Drop point °C	> 180
Timken OK Load kg.	25
Oil viscosity @ 40°C cSt	400
Water Washout	0.2%
Recommended temperature Range	-10°C to 130°C
