

MEGA LUBE

OPEN GEAR GREASE LMG 400.

Characteristics: **OPEN GEAR LMG GREASE** is a tenacious extreme pressure, lithium calcium grease giving excellent water repelling properties and in combination with a high viscosity base oil fortified with molybdenum and graphite, enhances lubricity and load carrying capacity.

Application: **OPEN GEAR LMG GREASE** has been specially developed for applications where the combination of heavy loads, slow speeds and water washout exclude the use of conventional products. These conditions exist in heavy industries such as steel and paper mills, cement works and quarries.

OPEN GEAR LMG GREASE is recommended for the lubrication of heavily loaded slow running plain ball and roller bearings, OPEN GEARS, also as a chassis grease particularly suitable for "off road" equipment pin and bushes, etc. Due to the heavy base oil, this product is not to be recommended for high speed applications.

Data:

Thickening agent	Lithium / Calcium/ Polymer
Colour	Grey/black
NLGI Classification	2
Worked penetration @ 25 °C	280
Drop point °C	195
Timken OK Load kg.	25
Oil viscosity @ 40°C cSt	400
Water Washout	0.2%
Recommended temperature Range	-10 °C to 130 °C
