

# MEGA LUBE

## CALCIUM EP 2 GRAPHITE GREASE .

**Characteristics:** **CALCIUM EP 2 GRAPHITE GREASE** is a tenacious extreme pressure, calcium grease giving excellent water repelling properties and in combination with a high viscosity base oil fortified with GRAPHITE, enhances lubricity and load carrying capacity.

**Application:** **CALCIUM EP 2 GRAPHITE GREASE** has been specially developed for applications where the combination of heavy loads, slow speeds and water washout exclude the use of conventional products. These conditions exist in heavy industries such as steel and paper mills, cement works and quarries.

**CALCIUM EP 2 GRAPHITE GREASE** is recommended for the lubrication of heavily loaded slow running plain ball and roller bearings also as a chassis grease particularly suitable for “off road” equipment pin and bushes ,etc . Due to the heavy base oil, this product is not to be recommended for high speed applications.

**Data:**

Thickening agent	Calcium/ Polymer
Colour	Grey/black
NLGI Classification	2
Worked penetration @ 25 °C	280
Drop point °C	95
Timken OK Load kg.	25
Oil viscosity @ 40 °C cSt	460
Water Washout	0.2%
Recommended temperature Range	-10 °C to 130 °C
