

MEGA LUBE

RED RUBBER GREASE

DESCRIPTION:

Red Rubber Grease is a soft red special grease for very specific applications. Red Rubber Grease cannot be used in normal grease applications.

The Castor base oil is thickened with a Calcium Soap.

Red Rubber Grease assures excellent compatibility and is non-injurious with natural and SBR rubber, while providing good mechanical stability and water resistance.

A well-formulated additive package provides wear and rust protection, plus oxidation stability.

APPLICATION:

Red Rubber Grease is designed specially for the application and lubrication of systems of systems and components incorporating rubber components where a mineral based grease cannot be used due to incompatibility with greases containing mineral oils.

NOTE

Red Rubber Grease is not compatible with mineral oils or other greases and must not be mixed or contaminated.

TYPICAL CHARACTERISTICS:

Red Rubber grease

Appearance	Soft red grease,.
Drop Point °C (IP 132)	190 min
Penetration worked at 25°C	245 - 275
