

MEGA LUBE

ROCK DRILL GREASE (400)

Description:

ROCK DRILL GREASE (400) is a grey / black coloured grease, smooth textures homogeneous mixtures of premium quality base oils, calcium-base soap incorporating finely dispersed lubricating graphite.

This product has a strong affinity to metal surfaces and high resistance to water washout. The graphite acts as a solid lubricant, reduces friction, prevents scuffing and seizures even when grease is displaced.

Application:

ROCK DRILL GREASE (400) can be used in all types of rock drills where grease is recommended.

This grease is specially developed to provide an effective lubricant film which reduces wear of heavily loaded parts and prevents seizure.

Characteristics:

Appearance	Smooth, grey / black
Thickening agent	Calcium
NLGI Classification	0-00
Worked penetration	390-400
Drop point °C	90°C
Timken ok load , kg	20
Rust prevention , rating	Pass
